

ABSTRACTSULFATED POLYSACCHARIDES AND USES THEREOF IN MEDICAL TREATMENT

5 The invention provides sulfated oxidised regenerated
cellulose compounds, sulfated alginates, and the salts and
hydrates thereof. The compounds are obtained by sulfation
of oxidised regenerated cellulose with sulfur trioxide. The
invention also provides pharmaceutical compositions
10 comprising the compounds, in particular compositions for the
treatment of medical conditions mediated by a matrix
metalloproteinases and anticoagulant pharmaceutical
compositions.
